

# Robbie for Kit and Safety

## Top Priorities:

Make sure Everyone has safe sends and Everyone stays protected

## How it's going to happen:

I love ~~free~~ club kit. I've been using it for nearly two years and wouldn't have joined kayaking without all the available stuff for the club to use. I want to see that all the gear is kept the way it was for me, organised, hole free and paddle ready.

So why me?

- ✓ Will make the time to dedicate to the club
- ✓ Will learn how to fix stuff and teach others
- ✓ Would love to spend time trying to fix broken kit rather than my degree
- ✓ Feel like I have been missing out on the epoxy fume fun

Proposer: Max Seconder: Molly

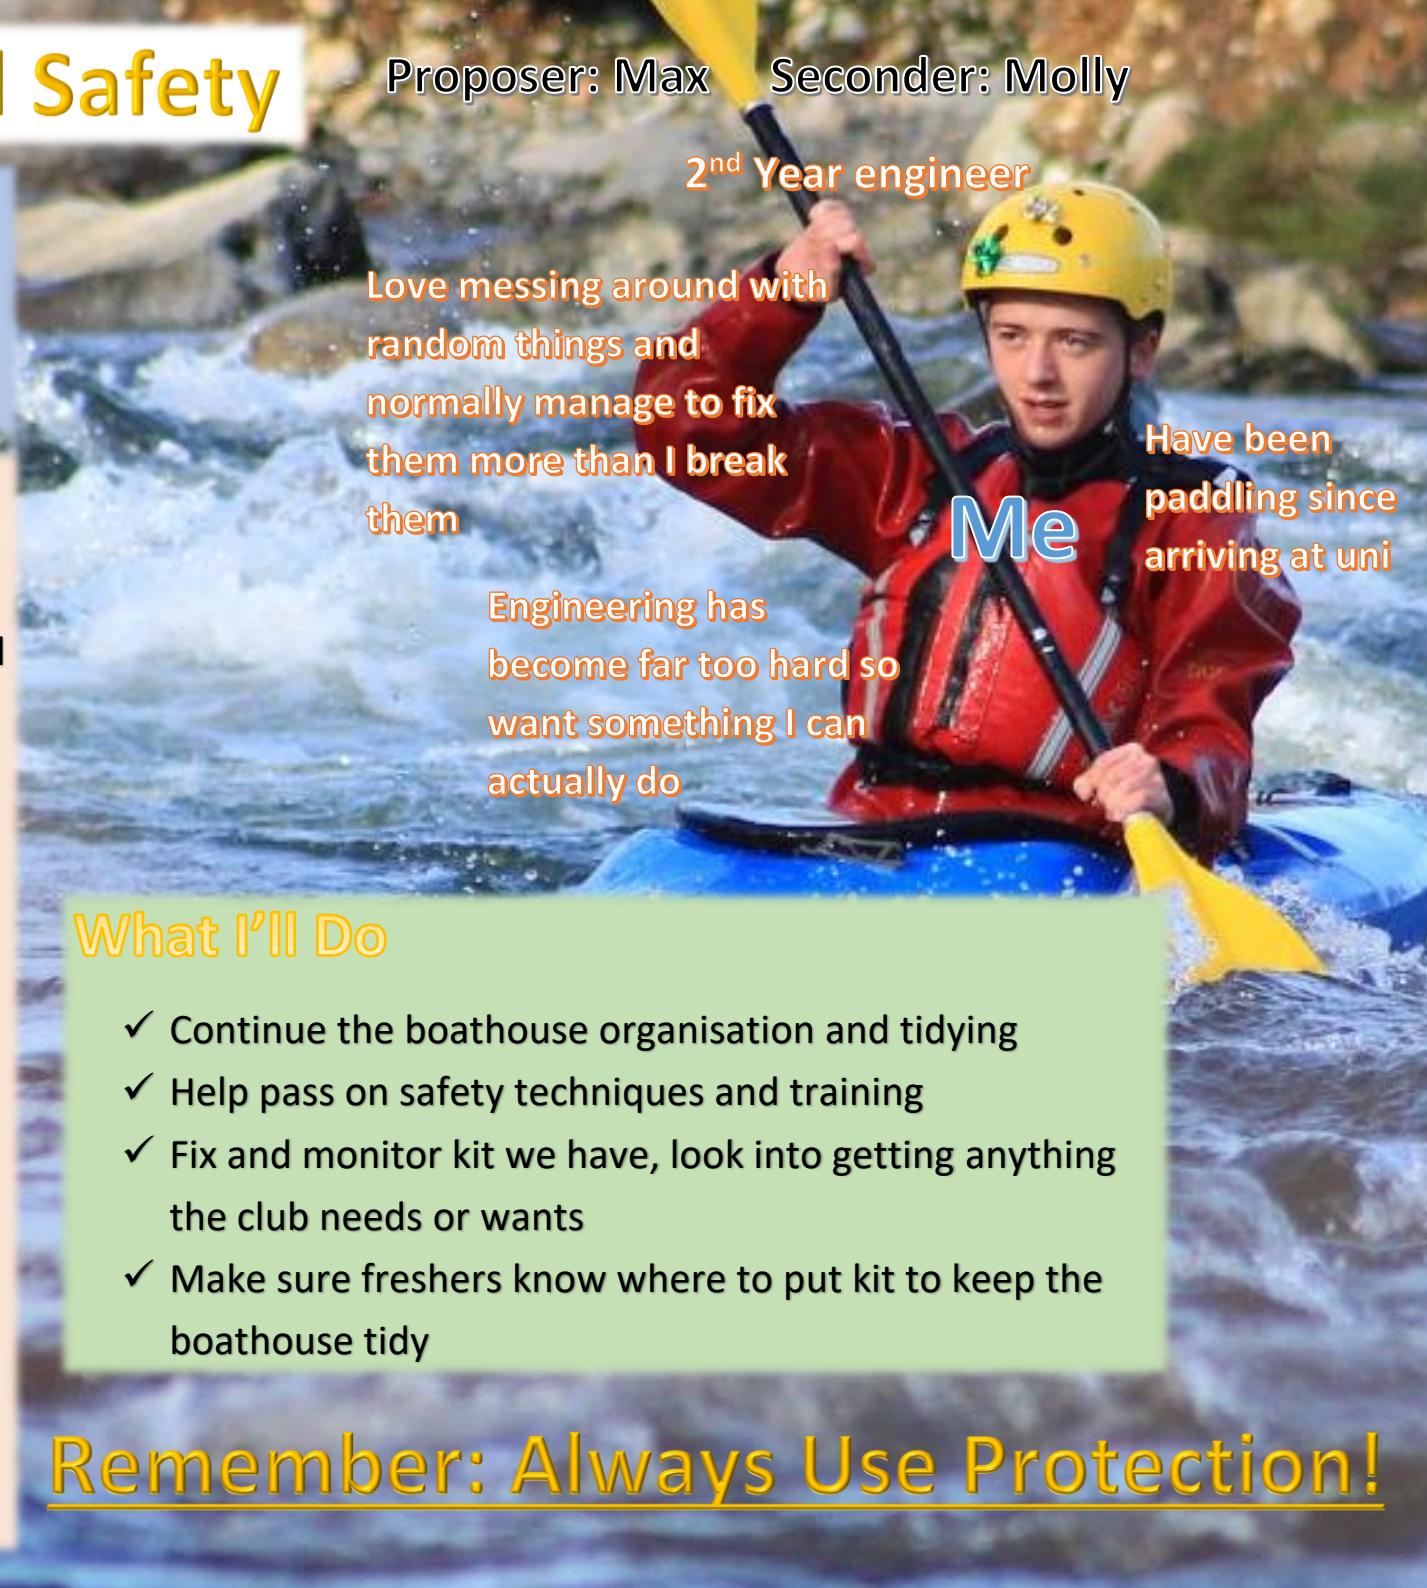

2<sup>nd</sup> Year engineer

Love messing around with random things and normally manage to fix them more than I break them

Me

Engineering has become far too hard so want something I can actually do

Have been paddling since arriving at uni

## What I'll Do

- ✓ Continue the boathouse organisation and tidying
- ✓ Help pass on safety techniques and training
- ✓ Fix and monitor kit we have, look into getting anything the club needs or wants
- ✓ Make sure freshers know where to put kit to keep the boathouse tidy

Remember: Always Use Protection!
